products for excellent lighting.

ASIA SOURCING SERVICES

Overview

ASIA SOURCING SERVICES

Your source for intelligent lighting solutions: Optimise your value chain, your development projects and your procurement processes with our 'Asia Sourcing Service'. We support you reliable and competent in procurement of complete luminaires:

- Panel
- Bulkhead
- Downlights
- linear Batten

INDIVIDUAL PROCUREMENT, EFFICIENT OUTSOURCING

Today, procurement can be this simple and efficient: as a result of many years in the market and our presence in the Asian markets, we cover all process steps. Take the pressure off your organisation, concentrate on your actual core business and rely on consistent adherence to high quality standards across the entire process chain.

Procurement is connected with lots of individual steps: checking suppliers, selecting components, ordering, carrying out quality audits and much more besides.

Long distances to suppliers in Asia are an added factor which increases your costs. Make it easy with a system partner which takes on your procurement for you and optimises it. A system partner that also supports you in the field of product development. From our range of services, you can select exactly those modules which optimise your value chain in a sustainable way. Whether this comes down to individual process steps, taking on the entire process chain, the procurement of luminaire parts or the procurement of complete lighting systems with your logo: **Everything is possible.**

Asia Sourcing Services Roadmap

Project Management | Product validation

Organise
project meetings

Sourcing | Vendor information

Vendor & product
information system

01

Sourcing | Vendor information

Propose potential
vendors & products

02

Project Management | Product validation

Finalise quotation

06

Finalise terms &
vendor agreement

07

SQM | Product validation

Conduct product test &
certification process

08

From a single source: from product development and procurement through the entire logistics process, we will support you as required. Select the appropriate modules from our range of services to optimise your added value. Efficient networking which increases your success.

YOUR BENEFITS

Excellent communication

We overcome language, intercultural and other obstacles for you. We understand our suppliers and can act or react quickly through same time zones. Professional vendor and project management systems and optimized processes guarantee a smooth communication in all directions as well.

A saving in terms of costs and time

Accelerate and simplify your procurement with a system partner which ensures expertise and quality – customised and efficient.

Global network

We have a presence all over the world and we support you from development to procurement. Both in Europe and in Asia.

Reliable quality

Upon request, we are able to handle everything locally. European standards will be reliably met over the entire process.
