

OEM Systems Group

products for excellent lighting.

CUSTOMISED PRODUCTS

Overview

Custom-made products for excellent light.

Brick by brick to excellent light: The OEM Systems Group meets with the competence of its companies BAG electronics and ZALUX and its strategic partner SEITEC your specific requirements - from the electronic component to the complete luminaire. In addition to our extensive standard program we adapt our customised products to your lighting requirements.

This way you can configure components such as mechanical parts of luminaires, LED modules and electronic control gears in parameters such as energy efficiency, durability and protection class matching your needs. Together we will find lighting solutions that combine a maximum of flexibility, cost efficiency and fast feasibility. Real customisation for your project.

Customisation by example of the BASE+ system

Luminaire materials

Configuration of various characteristics such as mechanical resistance (protection class and impact resistance) and temperature ranges

Electronic control gears

Different versions e.g. in performance, output current, dimmability and service life

Optical parameters

Customisation to e.g. light distribution, UGR and uniformity

Smart maintenance and energy monitoring

By combining the software zitares360 with the programmable control gears of the ZITARES intelligent series you can quickly and easily configure the system to meet your requirements

YOUR
BENEFITS

**High
flexibility**

Fast and targeted response to your requests and project requirements from design to manufacturing.

**One-Stop-
Shop**

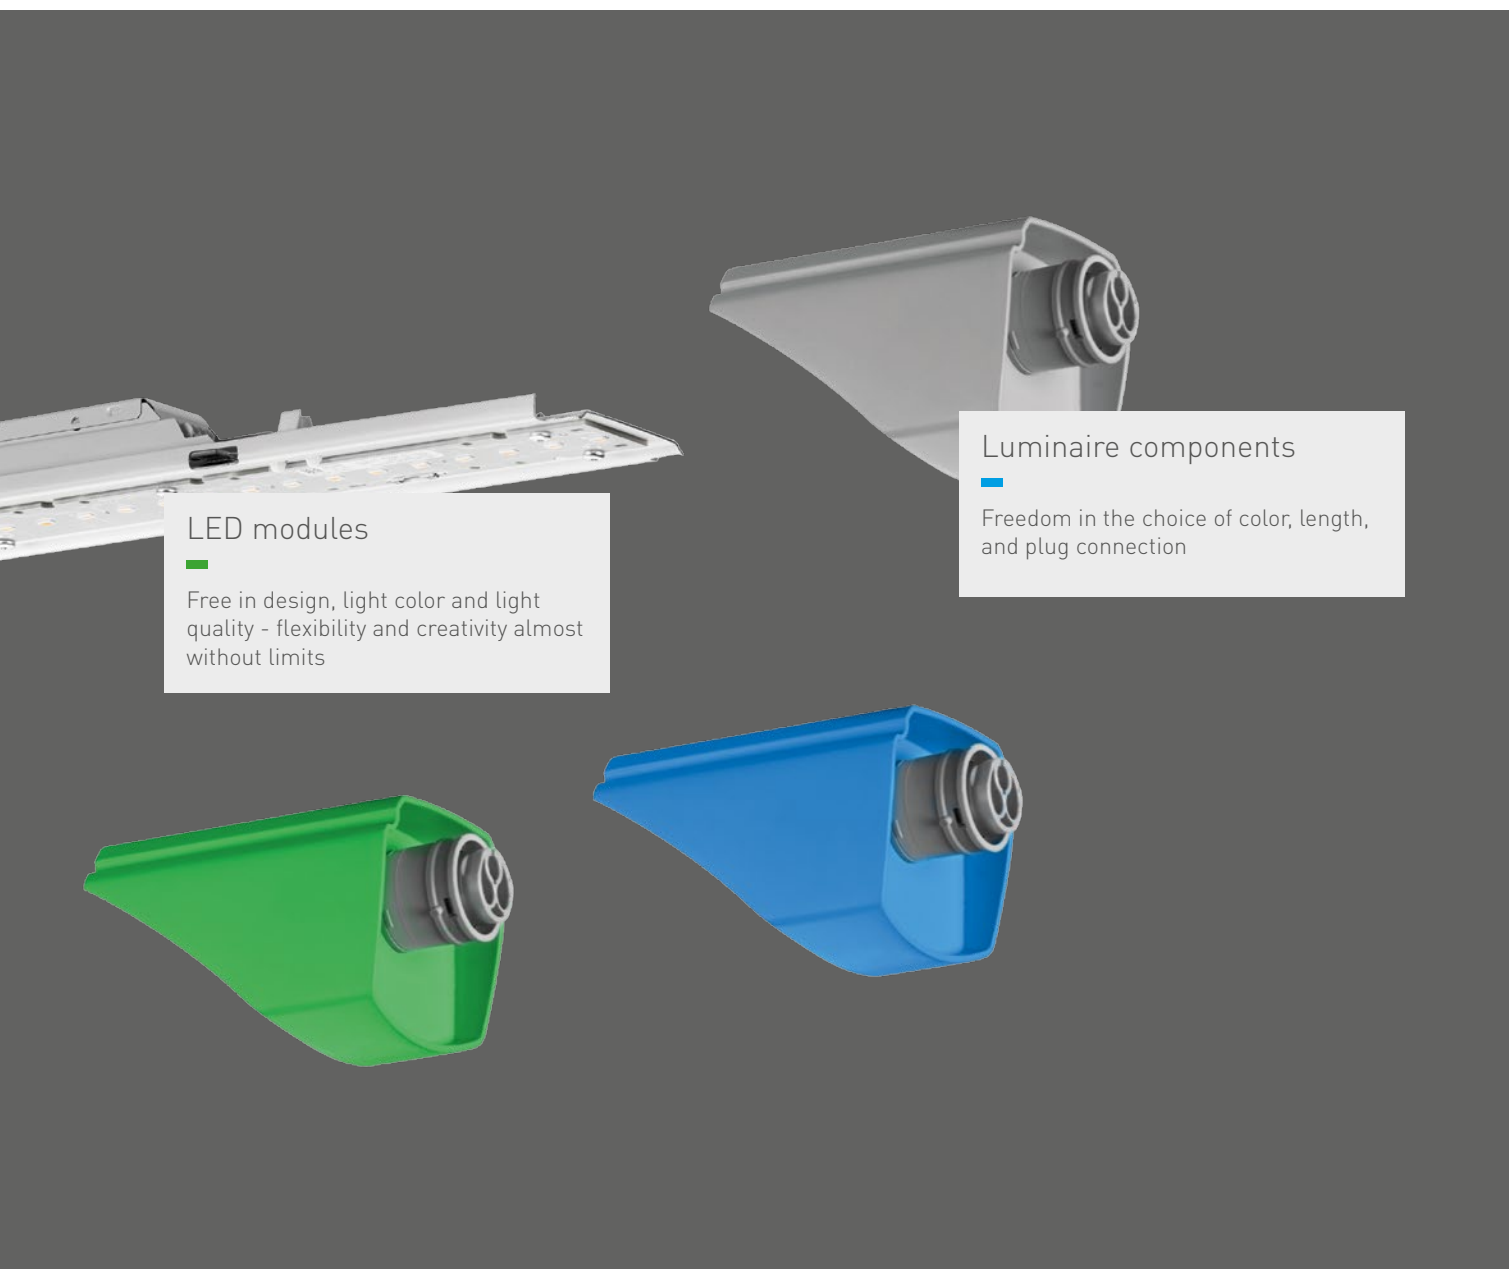

The complete range of components for excellent light from a single source: ranging from high quality standard products to customer specific solutions and from individual LED components to complete luminaire solutions.

**Aligned
overall concept**

Hardware and software are closely engaging and create added values for your products.

**European
know-how**

Designed and developed in Germany and Spain for maximum reliability, quality and adherence to delivery dates.

LED modules

Free in design, light color and light quality - flexibility and creativity almost without limits

Luminaire components

Freedom in the choice of color, length, and plug connection
